

Strategy Intern / Consultant – Case Study Brief

Background:

You are applying for a Strategy Intern / Consultant role at a fast-growing technology consulting organization headquartered in the UAE. Our teams operate fully remotely and work with clients across the region and beyond. Our core focus areas include **Digital Transformation, Data Engineering & Analytics, and AI-driven Solutions.**

In the year 2025, our organization faced several operational and strategic challenges that impacted our growth, profitability, and employee satisfaction.

Key Problem Areas Identified:

1. Training & Upskilling

- Lack of a structured training roadmap
- Limited focus on future-ready skill development

2. Innovation & Collaboration

- Low innovation output
- Siloed working and reduced inter-team collaboration

3. Employee Engagement

- Insufficient initiatives for employee well-being and engagement
- Work-life balance concerns

4. Presales & Estimations

- Inadequate scoping and complexity assessment in presales
- Underestimated effort leading to budget and delivery issues

5. Project Execution

- KPIs consistently missed across delivery teams
- Lack of proactive project management
- Poor stakeholder management
- Budget overruns and timeline extensions

6. Account Strategy

- Lack of strategic account prioritization

- Taking on unprofitable or non-aligned accounts

7. AI Focus

- Slow adoption of AI internally and in client solutions
- No structured roadmap for AI capabilities

8. Resource Planning

- Poor forecasting and allocation leading to burnout
- Imbalanced workload distribution

9. BU Splits

- Currently BUs are split separately as Digital, Data and AI and hence not helping to get 360 degree visibility and control of the business

Your Role:

You are a **Strategy Consultant** onboarded to support the newly formed **Strategy & Transformation Team**. Your responsibility is to analyse the situation, prioritize problem areas, and propose actionable, structured strategies that can address these challenges.

Your Task:

Prepare a strategic response addressing the following:

1. Strategic Vision

- Provide a strategic vision and roadmap to address the challenges and how the organization can move towards positive outcomes

2. Strategic Themes

- Identify **key strategic themes or pillars** that can guide the organization in addressing the above problem areas over the next 12 months.

3. Strategic Objectives & Initiatives

For **each strategic theme**, define:

- **Strategic Objectives**
- For each objective, list **Initiatives or Programs**
- Highlight **who should lead or be involved** in these initiatives (e.g., Practice Leads, Project Managers, HR, etc.)

4. Leveraging Artificial Intelligence for Strategic Advantage

Given the organization's focus on Digital Transformation, Data Engineering & Analytics, and AI-driven solutions, it is expected that the strategic response also considers how Artificial Intelligence can be embedded into internal operations and client-facing capabilities.

As part of your strategy, identify opportunities where AI-enabled approaches, intelligent automation, or data-driven decision frameworks could support improvements across the problem areas identified above.

Your response may include, but is not limited to:

- Potential areas within training, presales, project delivery, resource planning, or account strategy where AI could enhance decision-making, forecasting, productivity, or collaboration.
- High-level concepts for AI-enabled tools, platforms, or internal capabilities that could help the organization improve operational efficiency, innovation output, or client value creation.
- Recommendations on how the organization could gradually build AI maturity internally while aligning with its consulting offerings.

5. Execution Approach

Propose a **governance or tracking mechanism** that ensures initiatives are driven and outcomes are measured effectively. Include:

- Key roles in governance
- Review frequency
- KPIs or metrics for tracking success

6. Quick Wins

Recommend **few quick wins** the strategy team can drive in the first 2 quarters to create early impact and buy-in across the organization.

7. Culture & Collaboration

Share **ideas** to foster a culture of collaboration, innovation, and accountability in a fully remote environment.

Key Pointers:

- You will be presenting the strategy to the CXO team of the organization to get their buy in. The presentation should provide crystal clear understanding of the

proposed strategic vision, roadmap, approach & mark an impression on the CXO team.

- Presentation Mode: Power Point presentation. Candidates can use Excel for any supporting data, if required.
- Make suitable assumptions as necessary.
