

1. Strategic Vision & Roadmap

Vision: To become the region's premier "Integrated Intelligent Consultancy" by 2027, where AI-driven internal excellence powers superior digital and data-driven client outcomes.

The 12-Month Roadmap

- **Q1: Stabilization & Foundation:** Launch the Strategy & Transformation Team and implement "Quick Wins" to address burnout and presales leakage.
- **Q2: Integration & Upskilling:** Restructure Business Units (BUs) for 360-degree visibility and launch the structured AI-upskilling roadmap.
- **Q3: AI-Enabled Scaling:** Deploy internal AI agents for resource forecasting and project management.
- **Q4: Cultural Maturity:** Achieve full cross-team collaboration and transition to a proactive, data-driven account strategy.

2. Strategic Themes & Pillars

We will focus on three core pillars to drive the transformation:

1. **One-Firm Synergy:** Breaking down BU silos to create a unified view of Digital, Data, and AI.
2. **AI-First Internalization:** Embedding AI into the "nervous system" of the organization (presales, delivery, HR).
3. **Human-Centric Excellence:** Prioritizing structured growth, well-being, and accountability in a remote environment.

3. Strategic Objectives & Initiatives

Theme	Strategic Objective	Key Initiative/Program	Lead/Involved
Operational Control	Unified Business Visibility	Project "360 Nexus" : Merging Digital, Data, and AI BUs into an integrated reporting structure.	CEO, Strategy Team
AI Leadership	Accelerate AI Adoption	AI Center of Excellence (CoE) : Developing internal roadmaps and client-facing AI templates.	CTO, Practice Leads
Financial Health	Revenue Leakage Prevention	Presales Precision Framework : AI-assisted scoping and historical cost-matching for estimations.	Sales Leads, PMs
Talent Growth	Build Future-Ready Skills	The "Consultant 2.0" Roadmap : Structured upskilling in AI-driven solutions and soft skills.	HR, Practice Leads

4. Leveraging AI for Strategic Advantage

The organization will utilize its core competencies internally to solve operational hurdles:

- **AI for Resource Planning:** Implement a predictive forecasting tool to analyze project pipelines and consultant skills, preventing burnout by optimizing workload distribution.
- **Intelligent Presales:** A RAG (Retrieval-Augmented Generation) system to scan previous project data to provide realistic effort estimations and complexity assessments.
- **Project Delivery Copilot:** Automated tracking of KPIs with proactive alerts when budget or timeline variances exceed 5%, ensuring proactive management.
- **AI Maturity Growth:** Gradually move from using AI for productivity (low-risk) to AI-led client strategy (high-value).

5. Execution & Governance

To ensure these initiatives do not become "siloed" projects, we will implement the following:

- **Governance Roles:**
 - **Transformation Steering Committee:** CXOs and Strategy Team (Decision-makers).
 - **Pillar Champions:** Practice Leads responsible for specific initiatives.
- **Review Frequency:** Bi-weekly operational reviews and Quarterly Strategic Business Reviews (SBRs).
- **Success Metrics (KPIs):**
 - **Profitability:** % reduction in budget overruns.
 - **Retention:** 15% improvement in employee satisfaction scores.
 - **Efficiency:** Ratio of AI-assisted vs. manual effort in presales.

6. Quick Wins (Q1-Q2)

1. **AI-Driven Talent Audit:** Map current internal skills to identify immediate training gaps.
2. **Standardized Estimation Templates:** Mandate a "Complexity Scorecard" in presales to immediately stop underestimation.
3. **Cross-BU "Town Halls":** Monthly remote sessions to share innovation stories and reduce silos.

7. Culture & Collaboration

In a fully remote environment, culture must be intentional:

- **Radical Transparency:** Monthly dashboards shared with all employees regarding organizational health.
- **Innovation "Hack Weeks":** Quarterly time-boxed events where cross-functional teams build AI tools to solve internal problems.
- **Wellness Check-ins:** Structured "No-Meeting Fridays" and mental health support to address burnout concerns.
